# How is *Taḍmīn* (Implication of Meaning) Translated in the Qur'an? An Assessment of Four English Translations of the Fourth *Sūrah An-Nisā* (Women): An Ongoing Project

#### **Abdullah Soliman Nouraldeen**

English Language Lecturer, Islamic University of Madinah, Saudi Arabia; PhD researcher, University of Leeds, United Kingdom Corresponding Author: Abdullah Soliman Nouraldeen, E-mail: asalqurashi@iu.edu.sa; mlasn@leeds.ac.uk

#### **ABSTRACT**

This paper is a part of ongoing project of Nouraldeen (2020; 2021a; 2021b). The project aims at studying and assessing the Qur'an translation of the  $\bar{a}y\bar{a}t$  which embodies one type of  $tadm\bar{n}n$ , complete  $tadm\bar{n}n$ , in the entire Qur'an. This paper studies, analyses and assesses the  $\bar{a}y\bar{a}t$  with  $tadm\bar{n}n$  found in the fourth  $s\bar{u}rah$  (chapter), an- $Nis\bar{a}'$  (Women). This project is important in that it appreciates the rhetorical aspect of complete  $tadm\bar{n}n$ , which provides the reader with rich, additional meaning in a concise way. Four Muslim-Arab authored English translations are studied and assessed through two Arabic sources in which complete  $tadm\bar{n}n$  can be identified. Textual analysis is applied to the source text and the target text. All the four translators fail to pay attention to  $tadm\bar{n}n$  in their translations, except for Khattab in  $\bar{a}yah$  (verse) 1 and  $\bar{a}yah$  3, though he does not translate the explicit verb, and Bridges in  $\bar{a}yah$  1, who successfully translates  $tadm\bar{n}n$ .

### **KEYWORDS**

Hadf (ellipsis), complete tadmīn, types of tadmīn, Qur'an translation, standard collocation, implicit noun/verb, explicit noun/verb, implicit preposition, explicit preposition

ARTICLE DOI: 10.32996/ijllt.2022.5.3.28 | RECEIVED: 15 February, 2022 | ACCEPTED: 02 March, 2022

#### 1. Introduction

This section summarises most of the ideas in Nouraldeen (2020; 2021a; 2021b). *Tadmīn* is a linguistic-rhetoric phenomenon in Arabic, where a verb is followed by a preposition with which does not standardly collocate, and thus indicates an ellipsis. *Tadmīn* is used mainly for succinctness, which is a characteristic of Arabic. Another purpose is when *tadmīn* is used in the Qur'an to help its readers and listeners to engage in *tadabbur*, which is pondering deeply the meanings of the Qur'an. The implicitness of the noun and verb motivates the reader to engage in *tadabbur* and attempt to deduce the implicit meaning. Moreover, *tadmīn* provides additional, interesting meanings.

#### 1.1 Is tadmin in the Qur'an of one type only?

*Taḍmīn* in the Qur'an is classified according to the presence or absence of the elements of *taḍmīn*, i.e. verbal noun/verb and preposition. Table 1 below illustrates this clearly. This paper is interested in studying the first type, complete *taḍmīn*, because this reflects the rhetorical aspect and presents clearly the double meaning embodied in it.

Туре	explicit noun <sup>1</sup> /verb	implicit preposition	implicit noun/verb	explicit preposition
complete	✓	✓	✓	✓
incomplete implicit preposition	✓	N/A	✓	✓
incomplete explicit preposition	✓	✓	✓	N/A
nominal/verbal	✓	N/A	✓	N/A
incomplete noun/verb	✓	✓	N/A	<b>✓</b>

Table (1) Different types of tadmin in the Qur'an (Nouraldeen, 2021a, p. 293)

 $Tadm\bar{\imath}n$  is linked to  $bal\bar{a}gah$  (rhetorical science) in two different but related aspects. It falls within  $i\bar{\imath}g\bar{a}z$  (succinctness), as a specific type of Arabic style, including hadf (ellipsis). Likewise, it is categorised as a sub-type of hadf.

The challenging but interesting part of the translation of *tadmīn* in the Qur'an lies in its invisibility, unless a Qur'an translator is aware of this phenomenon, and pays attention to the non-standard collocation of an explicit verbal noun/verb with an explicit preposition. Moreover, the translator needs to refer to *tafāsīr* (exegeses) as soon as *taḍmīn* is observed. Alternatively, the translator can also engage in *tadabbur* and consequently infer the implicit elements in the *āyah*, as long as the inferred elements are in harmony with the explicit ones and the context of the *āyah*.

Complete  $tadm\bar{t}n$  merits further investigation. This study, as a part of an ongoing project dedicated to the translation of complete  $tadm\bar{t}n$  in the whole Qur'an, is an attempt to plug the gap in studies on this phenomenon by observing carefully how this Qur'anic feature is rendered in English and how these translations can be improved. The extra meaning suggested by complete  $tadm\bar{t}n$  makes it fruitful to convey this implicit meaning in the ST, resulting in an explicit TT.

#### 2. Research Questions

This research addresses the following questions:

- a) Are Qur'an translators of Islamic and Arabic origin aware of tadmīn in the Qur'an?
- b) How do Qur'an translators of Islamic and Arabic origin translate taḍmīn in the Qur'an?
- c) How can the four Qur'an translations of complete taḍmīn be improved?

#### 3. Methodology

As this paper is a part of an in-progress and ongoing project studying and assessing the Qur'an translation of the  $\bar{a}y\bar{a}t$  including complete  $ta\phi m\bar{u}n$  in the whole Qur'an, this study applies the same methodology as that of Nouraldeen (2021a; 2021b), but on different  $\bar{a}y\bar{a}t$ .

Four recent complete English Qur'an translations, produced by four Muslim-Arab authors, will be analysed and studied. This set of criteria is taken into consideration for two reasons. Firstly, being recent indicates that these translations are based on the wealth of previous translations and, therefore, the authors will probably have developed and improved them. Secondly, being Muslims with an established and deep knowledge of Arabic, and bearing in mind the translators are themselves Arabs, suggests translations which carefully observe and appropriately transfer the linguistic and rhetorical aspects of the Qur'an.

As for their established and deep knowledge of Arabic, which presumes their mastery of Arabic and which will probably have a positive effect on Qur'an translation, the first three of the four translators are academics and have received their education at Al-Azhar.

Abdel Haleem (2005, p. i) "was born in Egypt, and learned the Qur'an by heart from childhood. Educated at Al-Azhar, Cairo, ... he has taught Arabic at Cambridge and London Universities since 1966".

Hammad (2009, p. iv) is introduced as a professor who taught "at the University of al-Azhar, Faculty of Languages & Translation, Department of English".

Khattab (2016, p. ii) "received his Ph.D., M.A., and B.A. in Islamic Studies in English with Honors from Al-Azhar University's Faculty of Languages & Translation ... held the position of Lecturer at Al-Azhar University for over a decade". At the end of his translation, Khattab (2016, p. 5 in Arabic) considers his translation as distinct in several respects. One of them is that he is acquainted with Islamic Studies, Arabic Sciences and translation principles, as he studied at Al-Azhar for thirty years.

<sup>&</sup>lt;sup>1</sup> There are different types of nouns in Arabic. The ones that are used with  $tadm\bar{n}n$  so far are the verbal noun المصدر and the active participle اسم (maşdar) or infinitive is defined by Rosenhouse (2006, vol. 4, p. 659) as "a fixed nominal form associated with the derived forms or patterns of the verb (' $awz\bar{a}n$ )". اسم الفاعل  $(ism\ al-f\bar{a}\bar{n}il)$  "denotes 'the agent noun'" (Carter, 2006, vol. 2, p. 429).

Bridges<sup>2</sup> is a translation written by a team member of translators and linguists (2020, p. xxxvi). The team coordinator and the main translator is Imam<sup>3</sup> Fadel Soliman. "He received his Master's degree in Shariah in 2008" (Bridges Foundation, 2016).

The four translations I have chosen are (a) The Qur'an: A New Translation by M.A.S. Abdel Haleem (2005), (b) The Gracious Qur'an: A Modern-Phrased Interpretation in English by Ahmad Zaki Hammad (2009), (c) The Clear Qur'an: A Thematic English Translation of the Meaning of the Final Revelation by Mustafa Khattab (2016), and (d) Translation of the Ten *Qira'at* of the Noble Qur'an by Bridges (2020). The *āyāt* involving complete *taḍmīn* will be analysed, discussed and assessed.

As there is no reference in Arabic, to the best of my knowledge, that encompasses all  $\bar{a}y\bar{a}t$  with complete  $tadm\bar{n}n$  in the Qur'an, I had to consult different sources to pinpoint some of the places where it occurs in the Qur'an. The references used in this study are Ibn  $\S \bar{a} \bar{s} \bar{u}r$  (1984) and Fadel (2005). Fadel (2005) refers to and quotes from different  $taf\bar{a}s\bar{i}r$  (Qur'an exegeses). Sometimes, he identifies implicit nouns/verbs and prepositions which are either different from the  $taf\bar{a}s\bar{i}r$  he quotes from or are not pointed out by them. It will be stated when analysing and discussing the translations, whether the implicit element is identified by one of the  $taf\bar{a}s\bar{i}r$  or by Fadel (2005). Ibn  $\S \bar{a} \bar{s} \bar{u}r$  (1984) is selected out of the other  $taf\bar{a}s\bar{i}r$  because Fadel (2005) is fairly comprehensive, as he quotes from Ibn  $\S \bar{a} \bar{s} \bar{u}r$  only once, while Ibn  $\S \bar{a} \bar{s} \bar{u}r$  (1984) discusses complete  $tadm\bar{u}n$  thoroughly in the Qur'an. Sometimes, Ibn  $\S \bar{a} \bar{s} \bar{u}r$  (1984) quotes from other  $taf\bar{a}s\bar{i}r$ .

As noted, this study, coupled with my previous ones (Nouraldeen, 2020; 2021a; 2021b), is a part of an ongoing project which I am working on to cover all  $\bar{a}y\bar{a}t$  with complete  $ta\bar{q}m\bar{n}n$  in the Qur'an. The  $\bar{a}y\bar{a}t$  chosen for this project will be studied as they are arranged in the Qur'an starting from the first  $s\bar{u}rah$  to the final one, unlike in Fadel (2005) where they are not unfortunately arranged in the same order as they appear in the Qur'an. I believe following the arrangement of the Qur'an when studying  $ta\bar{q}m\bar{n}n$  will facilitate analysis and discussion and make it easier for the reader to follow.

The  $s\bar{u}rah$  that will be analysed and discussed in this study is the fourth one an- $Nis\bar{a}'$  (Women). The four English translations of the Qur'an will be analysed and discussed using the four-element model that was suggested by Nourladeen (2020, p. 240) and modified by Nourladeen (2021a, p. 293) (see table (1) above). A suggested improved translation to reflect  $ta\phi m\bar{t}n$ , where needed, will be provided in each  $\bar{a}yah$ .

#### 4. Analysis and Discussion

In each āyah (verse), the four English translations will be presented, followed by a table which arranges the four elements of taḍmīn and finds which element is present or absent in these translations. After that, the ST and the TTs will be discussed and analysed and an improvement to the translations wherever needed will be suggested, answering the third research question. The first two research questions will be answered based on the outcomes of the analysis and discussion.

#### Ayah (verse) 1

قَالَ تَعَالَى: ﴿ وَلَا تَأْكُلُواْ أَمُوالَهُمْ إِلَىٰٓ أَمُوالِكُمْ ﴾ [النساء: 2]					
Abdel Haleem (2005, p. 50): and do not consume their property with your own. [Q 4:2] Hammad (2009, p. 127): Nor shall you consume their wealth with your own wealth. Khattab (2016, p. 61): nor cheat them by mixing their wealth with your own. Bridges (2020, p. 51): and do not devour their wealths by combining them with your pl wealths. ['pl' stands for 'plural']					
Elements of	explicit	implicit	implicit	explicit	
<i>taḍmīn /</i> Translators	verb	preposition	verb	preposition	
Abdel Haleem	consume	with	-	-	
Hammad	consume	with	-	-	
Khattab	-	with	mix	-	
Bridges	devour	with	combine	-	

<sup>&</sup>lt;sup>2</sup> A singular verb will be used when referring to this translation throughout this study, though it is a work of a team.

<sup>&</sup>lt;sup>3</sup> Imam is an Arabic title for a highly regarded scholar (although the criteria to decide upon this now might be different to those in the past), and is similar to 'doctor', the highest level of degree awarded by a university.

The source text (ST) has complete *tadmīn*, following the four elements of it (see table 1 above). These elements are the explicit verb تأكل ta'kul (literally translated as 'eat'), collocated with the implicit preposition مع mas (literally translated as 'with'); the implicit verb جمع ,خلط xalat, jamas (literally translated as 'mix' and 'combine', respectively), or خلط aḥāl (Fadel, 2005, pp. 220-221) (literally translated as 'add'), collocated with the explicit preposition إن الأوادية المعالمة المعالمة

Several *mufassirūn* (exegetes) believe that the implicit verb used in the *āyah* is خلط *xalat*, or خلط *jama*s. However, Fadel (2005, pp. 220-221) believes that it should not be one of these, because the purpose is not to 'mix', so that they show off, having this wealth, or to 'combine', so that they store it. Rather, he believes that it should be أحال *aḥāl*, as they 'add' the orphans' wealth to theirs for the purpose of 'stealing' it. Therefore, when they 'eat' the orphans' wealth, they are motivated by their 'desire for eating'. However, when they 'add' the orphans' wealth to theirs, they are motivated by their 'desire for stealing'.

Unlike Bridges, Abdel Haleem and Hammad translate the explicit verb, without noticing that the explicit preposition ildetilde ildetild

Bridges, I believe, is aware of *tadmīn* in this *āyah*. It translates the explicit verb تأكل *ta'kul* (literally translated as 'eat') as 'devour', conveying the connotation of 'greediness'. This relays the idea of 'desire' behind 'eating' the orphans' wealth. As for the implicit verb, Bridges also seems familiar with it, interpreting it as 'combine', though this does not tally with what Fadel (2005, pp. 220-221) believes, that the implicit verb is possibly أصل (literally translated as 'add'). The explicit preposition, however, is probably not translatable here, as the verb 'devour' is not normally followed by a preposition in English.

Another possible suggested translation which may convey the Arabic style by communicating the four elements of complete  $tadm\bar{\iota}n$  reads as follows: 'and do not devour their wealth along with yours or add it to yours'. Here, 'devour' and 'with' represent the explicit verb and the implicit preposition, while 'add' and 'to' translate the implicit verb and the explicit preposition.

#### Āyah (verse) 2

قَالَ تَعَالَى: ﴿ ٱرْزُقُوهُمْ فِيهَا ﴾ [النساء: 5]					
Abdel Haleem (200	5, p. 50): make provisi	ion for them fron	n it. [Q 4: 5]		
	128): provide for then				
Khattab (2016, p. 62	2): feed them from	it.			
Bridges (2020, p. 51	): provide for them fr	om it.			
Elements of	explicit	implicit	implicit	explicit	
<i>taḍmīn /</i> Translators	verb	preposition	verb	preposition	
Abdel Haleem	make provision	from	-	-	
Hammad	provide for	from	-	-	
Khattab	feed	from	-	-	
Bridges	provide for	from	-	-	

This part of the  $\bar{a}yah$  contains four elements from which complete  $tadm\bar{u}n$  is formed. The explicit imperative verb ارزق urzuq (literally translated as 'provide for') is standardly collocated in Arabic with the implicit preposition من min (literally translated as 'from'). However, in Fadel (2005, p. 357), the implicit imperative verb التُجِر titajir (literally translated as 'do business') is standardly collocated in Arabic with the explicit preposition titajir (literally translated as 'in').

All the four translations interpret the explicit verb and the implicit preposition, taking no notice to the explicit preposition 'in', which does not standardly collocate with the explicit verb 'provide for'.

I suggest the following translation which reflects the four elements of complete *taqmīn* 'provide for them from it [their wealth] and trade in it'.

#### **Āyah** (verse) 3

قَالَ تَعَالَىٰ: ﴿ وَبِالْوَلِدَيْنِ إِحْسَانَا ﴾ [النساء: 36]

Abdel Haleem (2005, p. 54): Be good to your parents. [Q 4:36] Hammad (2009, p. 138): And to [your] parents you shall be good.

Khattab (2016, p. 67): And be kind to parents.

Bridges (2020, p. 55); and be good to both parents

bridges (2020, p. 33), and be good to both parents.				
Elements of	explicit	implicit	implicit	explicit
<i>taḍmīn /</i> Translators	verbal noun <sup>4</sup>	preposition	verbal noun	preposition
Abdel Haleem	Be good	to	-	to
Hammad	be good	to	-	to
Khattab	-	to	be kind	to
Bridges	be good	to	-	to

English uses one preposition for both verbal nouns 'being good' and 'being dutiful', unlike Arabic, which has a different preposition for them, i.e. برا بـ birran bi (literally translated as 'being good to' and 'being dutiful to').

All the translations, except Khattab, translate the explicit verbal noun as an imperative verb 'be good', followed by the same explicit and implicit preposition 'to', paying no attention to the implicit verbal noun  $\frac{1}{2}birr$  (literally translated as 'being dutiful'). Khattab, on the other hand, translates the implicit verbal noun  $\frac{1}{2}birr$ , in the form of an imperative verb, as 'be kind', which is also followed by the preposition 'to'. The reason why I believe 'be kind' is an interpretation of the implicit verbal noun  $\frac{1}{2}birr$  is that Khattab translates  $\frac{1}{2}birr$  in another  $\frac{1}{2}birr$  in anoth

The active participle بَرَ barr is used in āyah Q 19:14 وبرا بوالديه wa barran bi wālidayh. The four translations of وبرا بوالديه wa barran bi wālidayh are as follows: 'kind to his parents', 'and virtuous toward his parents', 'and kind to his parents', and 'and was very kind to his parents', respectively.

I believe a better translation of y birr would be 'honouring and being dutiful', for two reasons. First, y birr is defined by Ibn ʿāšūr (1984, vol. 16, p. 77, my translation) as 'honouring and seeking to be obedient<sup>6</sup>'. This definition is reflected in the translation I suggest above 'honouring and being dutiful'. In Longman (2022), 'honour' is defined as "to treat someone with special respect" and 'dutiful' as "doing what you are expected to do and behaving in a loyal and obedient way". Reading these two English definitions, and considering the Arabic definition of y birr given by Ibn ʿāšūr, one can argue that the proposed translation of y birr 'honouring and being is probably the most appropriate one. The second reason is that 'dutiful' is collocated in English with 'son'.

Considering the tadmīn in the Q 4:36, I suggest translating it as 'Be kind and dutiful to both your parents and honour them'.

<sup>&</sup>lt;sup>4</sup> It is used as المصدر al-masdar 'verbal noun' in the āyah; however, the four translators translate it as a verb (the explicit and implicit ones).

bm al-fāsīl is a type of a noun in Arabic, which is formed from a verb to indicate a doer of the verb. اسم الفاعل

<sup>&</sup>lt;sup>6</sup> The Arabic source text reads الإكرام والسعى في الطاعة

#### Āyah (verse) 4

# قَالَ تَعَالَىٰ: ﴿ وَكَانَ ٱللَّهُ عَلَىٰ كُلِّ شَيْءٍ مُّقِيتًا ١٤٥ ﴾ [النساء: 85]

Abdel Haleem (2005, p. 58): God controls everything. [Q 4:85]

Hammad (2009, p. 149): And ever is God an able watcher over all things.

Khattab (2016, p. 73): And Allah is Watchful over all things.

Bridges (2020, p. 60): And Allah has always been a Sustainer for everything.

bridges (2020, p. 00). And Alian has always been a Sustainer for everything.				
Elements of	explicit	implicit	implicit	explicit
<i>taḍmīn /</i> Translators	active participle <sup>7</sup>	preposition	active participle	preposition
Abdel Haleem	control	-	-	-
Hammad	able watcher	-	-	over
Khattab	Watchful	-	-	over
Bridges	Sustainer	for	-	-

In this part of the  $\bar{a}yah$  which has a complete  $tadm\bar{n}n$ , the explicit active participle مقيت  $muq\bar{\imath}t$  (literally translated as 'feeding') is standardly collocated in Arabic with the implicit preposition على li (literally translated as 'to' or 'for'), while the implicit active participle muttali' (literally translated as 'knowing') is standardly collocated in Arabic with the explicit preposition على  $rad\bar{\imath}a$  (literally translated as 'on') (see Ibn  $rad\bar{\imath}a$ , vol. 5, p. 144).

According to Ibn ʕāšūr (1984, vol. 5, p. 144), the explicit active participle مقيت muqīt basically means 'feeding'. It is used here figuratively to mean الحافظ al-Hāfiḍ 'the keeper', 'the protector' or 'the guardian', because the one who feeds usually protects from death. Another sense of the explicit active participle, as Ibn ʕāšūr (1984, vol. 5, p. 144) states, is المقتدر al-Muqtadir 'the extremely capable' (which is morphologically different from القادر al-Qādir 'the capable'). The third sense of the explicit active participle, according to Ibn ʕāšūr (1984, vol. 5, p. 144), is الوقيب ar-Raqīb 'the constantly watching'. However, as the explicit active participle does not standardly collocate with the explicit preposition, it is believed that there is an implicit active participle, which is مطلع muttaliʕ.

The four translations interpret this part of the *āyah* differently. Abdel Haleem translates the explicit active participle as 'control', which tallies with one sense of مقيت *muqīt* mentioned above, i.e. المقتدر al-Muqtadir 'the extremely capable', because 'control', according to Longman (2022), means someone who has power and makes something happen in the way they want. It is important to note that although the complete tadmīn in Arabic has four elements, these four elements will not always all appear in an English, because every language has its own grammatical norms. An example is Abdel Haleem's translation when 'control' in English is a transitive verb, not a verb which takes a following preposition.

Hammad and Khattab interpret the explicit active participle as 'able watcher/watchful', which corresponds with one sense of  $muq\bar{\imath}t$  mentioned above, i.e. الرقيب ar- $Raq\bar{\imath}b$  'the constantly watching', followed by the explicit preposition 'over', which is standardly collocated with the Arabic الرقيب ar- $Raq\bar{\imath}b$  and the English 'able watcher/watchful'. With this sense of مقيت  $muq\bar{\imath}t$ , there is no  $tadm\bar{\imath}n$  in this part of the  $\bar{\imath}yah$ .

However, according to Ibn ʕašūr (1984, vol. 5, p. 144), the explicit active participle مقيت muqīt means basically الحافظ al-Hāfiḍ 'the keeper', 'the protector' or 'the guardian'. It is then standardly collocated in Arabic with the implicit preposition يا أن (literally translated as 'to' or 'for'). By contrast, the explicit preposition على آعاقه كالمتابعة على المتابعة على المتابعة المتاب

Bridges, on the other hand, translates the explicit active participle as الرازق ar- $R\bar{a}ziq$  'the Sustainer', followed by the implicit preposition لِ (literally translated as 'to' or 'for'). 'Sustainer' in this context is meant to be a translation of مقیت  $muq\bar{\imath}t$  in its basic,

<sup>&</sup>lt;sup>7</sup> It is used as an اسم الفاعل *ism al-fāʕil* 'active participle', in the *āyah*; however, Abdel Haleem translates it as a verb.

specific sense 'feeding', or it could be meant by the translator to be in its general sense which includes anything that brings benefit to all living things (see Ibn Sāšūr (1984, vol. 5, p. 144).

اله sature (1984, vol. 5, p. 144) states that the explicit preposition على salā (literally translated as 'on') is standardly collocated with the implicit active participle مطلع muṭṭalis (literally translated as 'knowing'). Also, the explicit active participle مطلع muṭṭalis (literally translated as 'knowing'). Also, the explicit active participle مطلع al-Hafiḍ 'the keeper', 'the protector' or 'the guardian', which is standardly collocated in Arabic with the implicit preposition عاد الله (literally translated as 'to' or 'for') as used, for example, in Q 15:9.

Therefore, to reflect the *tadmīn* in English translation, I suggest the following translations: 'Allah is Knowing of all things and Protector of them', 'Allah is Knowing of all things and Keeper for them' or 'Allah is Knowing and Protector of all things'. Another suggested translation will also reflect what Ibn Sāšūr (1984, vol. 5, p. 144) states that this part of the *āyah* refers to "capability and knowledge8". I translate it as 'Allah is All-Knowing and capable of everything'.

# **Āyah** (verse) 5

قَالَ تَعَالَى: ﴿لَيَجْمَعَنَّكُمْ إِلَى يَوْمِرُ ٱلْقِيكَمَةِ ﴾ [النساء: 87]

Abdel Haleem (2005, p. 58): He will gather you all together on the Day of Resurrection. [Q 4:87]

Hammad (2009, p. 150): He shall, indeed, gather all of you to the Day of Resurrection.

Khattab (2016, p. 73): He will certainly gather 'all of' you together on the Day of Judgment.

Bridges (2020, p. 60): He will surely gather you [plural] to the Day of

Resurrection.

resurrection.				
Elements of	explicit	implicit	implicit	explicit
<i>taḍmīn /</i> Translators	verb	preposition	verb	preposition
Abdel Haleem	gather	on	-	-
Hammad	gather	-	-	to
Khattab	gather	on	-	-
Bridges	gather	-	-	to

The ST contains a complete  $tadm\bar{u}n$ . The explicit verb يجمع yajma (literally translated as 'gather') is standardly collocated in Arabic with the implicit preposition f (literally translated as 'in'). Also, the implicit verb يحشر yah,fur (literally translated as 'assemble/bring/herd') or يعوق  $yas\bar{u}q$  (literally translated as 'lead/drive') (Fadel, 2005, p. 274) is standardly collocated in Arabic with the explicit preposition fur (literally translated as 'to') (cf. Nouraldeen (2021b, p. 246), which has the same explicit active participle and the implicit preposition, but has a different implicit active participle and explicit preposition).

In terms of which elements of  $tadm\bar{u}n$  are translated, translators have different approaches. Abdel Haleem and Khattab translate the explicit verb 'gather', followed by the implicit preposition 'on' (literally translated as 'in'), in accordance with the English grammar that collocates 'on' with 'Day'. However, it is likely that the two translators did not consider the explicit preposition 'to'. On the other hand, Hammad and Bridges are literal when translating the explicit verb 'gather', followed by the preposition 'to', whose correspondent in Arabic الله ' $il\bar{a}$  is standardly collocated with the implicit verb yah, yah, (literally translated as 'assemble/bring/herd') or  $yas\bar{u}q$  (literally translated as 'lead/ drive').

Another āyah, Q4: 172, uses the verb يحشر yaḥšur, followed by its standard collocate, the preposition إلى 'ilā. The four translations translate this phrase as follows: 'gather before Him', 'assemble before Him', 'be brought before Him', and 'herd to Himself', respectively. Abdel Haleem translates both يحشر yaḥšur in Q4: 172, and يجمع yajmas in Q 4:87 as 'gather'. Nevertheless, as the most appropriate translation for يحشر yajmas is 'gather', it cannot reasonably be used to translate يحشر yaḥšur in the context of Q4: 87, since this obscures the distinction between يجمع yajmas and يحشر yahšur.

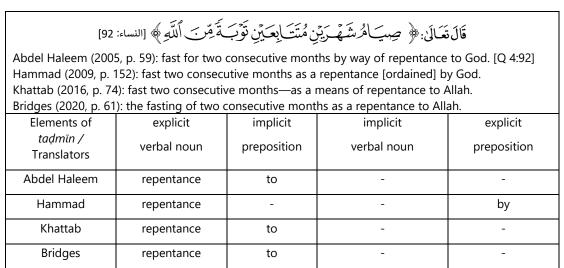

Page | 214

وعليه يدل قوله تعالى: وكان الله على كل شيء مقيتا فيكون راجعا إلى القدرة والعلم :The Arabic source text reads 8

Similarly, Q39: 71, uses the verb يسوق yasūq (in the perfect passive form سيق sīq), followed by its standard collocate, the preposition إلى 'ilā. The four translations relay these as follows: 'will be led to', 'shall be driven to', 'will be driven to', and 'were driven to', respectively

My suggestion to reflect the rhetorical style of  $tadm\bar{n}n$  in this part of the  $\bar{a}yah$  is to translate Q 4:87 as 'He will surely gather you all on the Day of Judgement and bring you to that Day'. The explicit and implicit verbs are used, but the use of prepositions is decided by the grammar of the language translated into, which is English here. Another proposed translation can read: 'He will surely gather you all on the Day of Judgement and drive you to that Day'.

#### **Āyah** (verse) 6

In this āyah which contains complete taḍmīn, the explicit verbal noun توبة tawbah (literally translated as 'repentance') is standardly collocated with the implicit preposition من min (literally translated as 'to'). Also, the explicit preposition من min (literally translated as 'from') is standardly collocated with the implicit verbal noun قبول qabūl (literally translated as 'acceptance') (see Ibn ʕāšūr, 1984, vol. 5, p. 162).

All the translators with the exception of Hammad render the explicit verbal noun توية tawbah, followed by the implicit preposition إلى 'ilā, paying no attention to the explicit preposition من min. Hammad, on the other hand, seems to be aware that the explicit preposition من min is not standardly collocated with the explicit verbal noun توبة tawbah, but he considers it something different from taḍmīn. He assumes that there is an elliptical verb 'ordained' which explains the occurrence of the explicit verbal noun توبة tawbah with the explicit preposition من min 'from'. 'By' in his translation functions as 'from'.

A suggested translation takes into consideration the complete  $tadm\bar{n}n$  reads: (following the style of the verbal noun of the ST) 'the fasting of two consecutive months, so you show repentance to Allah, and He, in turn, provides you a reward of acceptance'. Another suggested shorter version is 'fast two consecutive months, so you repent to Allah, and, He, in turn, accepts this fasting from you'.

# **Āyah** (verse) 7

Abdel Haleem (2005, p. 60): 'But was God's earth not spacious enough for you to migrate to some other place?' [Q 4:97]

Hammad (2009, p. 153): Was God's earth not spacious [enough] for you to migrate therein, [away from unbelief]?

Khattab (2016, p. 75): "Was Allah's earth not spacious enough for you to emigrate?"

Bridges (2020, p. 62): "Was Allah's earth not vast enough for you to emigrate therein?"

Bridges (2020, p. 02). Was raiding earth not vast enough for you to enrightee therein.				
Elements of	explicit	implicit	implicit	explicit
taḍmīn / Translators	verb	preposition	verb	preposition
Abdel Haleem	migrate	to	-	-
Hammad	migrate	-	-	therein
Khattab	emigrate	-	-	-
Bridges	emigrate	-	-	therein

In relation to the complete  $tadm\bar{\imath}n$  in this  $\bar{a}yah$ , the explicit verb تهاجر tuhajir (literally translated as 'migrate/emigrate') is standardly collocated with the implicit preposition إن fi (literally translated as 'to'). Also, the explicit preposition في fi (literally translated as 'in') is standardly collocated with the implicit verb تضرب fi (literally translated as 'travel).

Fadel (2005, pp. 645-647) justifies the view that there is *tadmīn* in this part of the *āyah*. In addition to 'emigration/migration', the use of the implicit verb 'travel' involves there being *jihad* (sacrifice) and effort, in leaving one's possessions, families and friends behind, and spending time travelling in the spacious earth, facing the pain of 'migration/emigration', the difficulties of earning a living, and the possible pursuit of enemies.

Abdel Haleem translates the explicit verb تهاجر tuhajir, followed by the implicit preposition إلى 'ilā, ignoring the explicit preposition في أرّ, which indicates an implicit verb, with which it standardly collocates.

Hammad and Bridges are literal that they translate the explicit verb تهاجر tuhajir, followed by the explicit preposition tuhajir, followed by the explicit preposition different preposition which is 'therein', rather than 'in'.

Interestingly, Khattab translates the explicit verb, تهاجر tuhajir, followed by no preposition, although the verb is standardly followed by the preposition 'to' in English.

My proposed improvement to the four translations, which features  $ta\phi m\bar{t}n$ , reads 'Was Allah's earth not spacious enough for you to travel in and emigrate to some other place?'

#### 5. Conclusion

It seems that the four translators are mostly not aware of  $tadm\bar{\imath}n$  when translating the Qur'an, except for Khattab in  $\bar{a}yah$  1 and  $\bar{a}yah$  3, though he does not translate the explicit verb, and Bridges in  $\bar{a}yah$  1, who successfully translates the first three elements of  $tadm\bar{\imath}n$ . The fourth element, the explicit preposition, cannot be translated sometimes. This is a matter of the grammar of the language whether a verb is followed by a preposition or an object, and an appropriate English translation may not employ any preposition if the English verb is transitive. However, the specific preposition used in Arabic is an indicator that there is an implicit verb if this preposition is not the one which standardly follows the verb in question.

The complete  $tadm\bar{l}n$  in Arabic should be reflected when translating into English, except that the English verb (the explicit and implicit) is not standardly followed by a preposition. In that case, the explicit and implicit verb should be rendered.

Most of the  $\bar{a}y\bar{a}t$  discussed above are translated literally, i.e. through translating the explicit verb/noun and the explicit preposition, paying no attention to the fact that the explicit preposition is not standardly collocated in Arabic with the explicit verb/noun, which consequently suggests an implicit verb.

It is unfortunate that the study did not include the views of the Qur'an translators on translating *taḍmīn* in the Qur'an. Further research may consider this. As this study is an ongoing project to study the translation of *taḍmīn* in the entire Qur'an, more work will need to be done by the researcher to study this.

#### Acknowledgement

I would like to express my deep gratitude to my PhD research supervisor, Professor James Dickins, for providing constant help, guidance and support in a friendly way. He always makes time to read my work, including this paper, and provides me with positive and invaluable feedback and insightful comments. He is the friendliest and the most supportive and helpful supervisor ever.
